

Leaks Stopped In Path of Record Storms at World Renowned Ski Resort

August 18, 2006

Topps Products, Inc.

RE: Aircraft B-Hangar Roof Repairs

Dear Sirs,

As you know, The City of Steamboat Springs Airport had for a number of years been unable to repair the B-Hangar roof leaks. It has now been over a year since your company repaired the hangar roof. Last winter was a record year for snow - fall and the roof snow loads were at their limits. The TOPPS SEAL product used to repair the roof performed as advertised and we have seen no roof leaks.

The TOPPS SEAL product solved a leaky roof problem that many others could not. Please add our name to your list of satisfied customers and feel free to use us as a reference if needed.

Sincerely,

Mel Baker
Airport Manager

SKI TOWN U.S.A.

is known for record snowfalls and as the home of more Olympians per capita than any place in the world.

During the year following Topps' application to the local airport, temperatures also dropped to -44° F. below zero. Snowfall hit a record 450" on the surrounding mountains.
