

TOPPS® Helps Keep Trucks Rolling!

Kenworth Truck Company — the leading maker of trucks you see traveling the highways - goes with TOPPS... the leader in roof coatings and maintenance! Founded in 1923, Kenworth has an extensive dealer network of more than 290 dealer locations in the United States and Canada.

The 30-year-old roof was facing the prospect of replacement or maintenance. Cost savings were estimated at over 275% compared to replacement. This work is credited with saving the budget and helping this world-class truck maker keep trucks rolling.

Special attention to repairs such as seams and rivets (right) make roofs watertight before applying the finishing coat of Topps Seal™. Bright white Topps Seal will reduce interior temperatures and save energy.

Poly Core™ is embedded in SeamGuard™ around skylights (below) for extra reinforcement and protection against leaks.
