

TOPPS SEAL™ Goes To Japan — Third Order for Nissan Motor Company

Three Orders In One Year = Customer Confidence!

Airless spray equipment gives a smooth, even finish. It creates a seamless, single-ply rubber roof without torches, fasteners, and most of all, without backbreaking labor costs or large crews.

For years the world's best automobile manufacturers have relied upon TOPPS® products to provide them with superior roof protection. Recently, the Nissan Motor Company showed their confidence in TOPPS by ordering TOPPS SEAL™ for three of its plants. The cost savings of restoring their roofs, rather than replacing them, is what attracted Nissan to TOPPS.

squares per day, dramatically reducing costs. The good condition of the roof required only a protective maintenance layer after repairs and reinforcements were made to isolated areas.

TOPPS SEAL provides the same level of excellence that Nissan builds into their automobiles. It retains its remarkable strength and flexibility in all temperatures, providing long-lasting protection. It retains its value — TOPPS SEAL will not chip, crack, or peel.

The use of airless spray equipment makes the savings of TOPPS SEAL even better. Three men can cover up to 150

ABOVE: Trowel-grade POLYPRENE™ supplies the extra tensile strength needed to stop leaks at cracks.

LEFT: Washing the roof surface with high-pressure water removes the surface dirt, dust & residue to provide the best surface for application.
