

Event Specialist Takes No Chances

Dignitaries including the Dalai Lama and Presidents Clinton/Bush Sr. (Hurricane Katrina relief effort) have relied upon Newport Tent Company to host their affairs. So it's no surprise that when leaks plagued their own building, the owners of this premier sheltering company turned to Topps Seal™ for sealing the 25,000 square foot metal roof structure.

Newport Tent is known as a specialist in the creation of elegant temporary settings for special occasions. Their spaces can include hardwood floors, linen clad tables, and fine crystal that must stay pristine.

Multiple patch and repairs had been attempted previously, yet problems seemed to get worse rather than better. A 4" rain immediately after completion — without a single leak — provided immediate proof that the Topps all rubber system was the proper solution.
